Regarding your request to have your letter of March 22, 2016, published in the next Saskatchewan Beekeepers Association (SBA) newsletter

Dear Carlos:

The board has decided to publish your March 22, 2016, letter to our website. We will also publish a notice in our newsletter directing people to the SBA web site if they wish to read your response to our concerns.

The board continues to have issues with the fundamental design of the project and does not support this project.

This will be our last communication with you regarding this project. The board considers this matter now closed.

As to future projects, the board continues to support the idea of national as well as regional studies regarding the health and wellbeing of Honey bees and would be open to collaborating with you in setting up any new national or regional studies in the future.

Sincerely

Jake Berg
SBA President

Simon Lalonde
SBDC President
